

WHAT ARE YOU DOING TO BAN CLUSTER BOMBS?

Dear Minister,

Around 100 countries have banned cluster munitions by signing the 2008 Convention on Cluster Munitions. This Convention is an historic achievement, but the work is only just beginning.

We urge you to:

Sign the Convention on Cluster Munitions, if you haven't done so already;

Ratify the Convention swiftly and work for quick entry into force to make the obligations legally binding;

Start implementation: destroy stockpiles, clear contaminated land, assist victims and help other states to implement the Convention.

Encourage other states to join this important Convention and build the norm against cluster munitions.

Thank you for taking action.

Signed:
